

# SEMINAR 6

## 1. OBJECTIVES

- Work with Qt framework and widgets.
- Create custom widgets and design the interface both manually and using Qt Designer.
- Exercise working with the signals and slots mechanism in Qt.

## 2. PROBLEM STATEMENT

Create a graphical user interface for the playlist application, which offers all the functionalities the console interface offered.

Below you have a sample GUI for the problem we have been using during the seminar (songs and playlists):
